ACKNOWLEDGEMENT

The Food, Medicine and Health Care Administration and Control Authority (FMHACA) of Ethiopia would like to extend its gratitude to the World Health Organization (WHO) for its technical assistance, meeting all financial expenses associated with consultative workshops and printing of the List of Medicines for Ethiopia. The Authority would also like to thank Management Sciences for Health/Strengthening Pharmaceutical Systems (MSH/SPS) for its technical support in revising this list.

Last but not least, the Authority would like to give special acknowledgement to the National Drug Advisory Committee and all participants of the consultative workshops for their invaluable contributions in scrutinizing and finalizing this list.

FOREWORD

Pharmacotherapy has always been an integral part of health care system and will remain so in the future. This relies on the availability of safe, effective and affordable medicines with the required quality, in reasonable amount. Moreover, on the rational prescribing, dispensing and use of such medicines.

Ethiopian drug policy ensures that medicines which are required for prevention, diagnosis, treatment, mitigation and rehabilitation of diseases affecting the majority of Ethiopian people have to be identified and classified to respective levels of health service delivery.

The List of Medicines for Ethiopia is hereby revised for the sixth time in light of the above principle and the latest developments in fields of medicine and pharmacy. By taking the new three-tier health care delivery system into consideration, the sixth edition of the National Medicines List of Ethiopia will be further categorized. Hence, users of this medicines list are advised to refer to the respective sub-lists relevant to their level of services.

It gives me a great pleasure to introduce this edition of the list to all beneficiaries, which is the fruit of the joint effort of the staff of the Authority, the National Drug Advisory Committee, development partners as well as the participants of the review workshops.

I hope that the National Medicines List as well as its sub-lists will serve as useful guides for the production, procurement, distribution and prescription of medicines in the country.

Finally, I would like to express my gratitude to all those who have directly or indirectly extended their helping hands in the revising and printing of the list. I also call upon health professionals and interested parties to continue their usual support in updating the list by forwarding comments and suggestions to the Food, Medicines and Healthcare Administration and control Authority of Ethiopia.

YEHULU DENEKEW ALAMNEH
Director General,
Food, Medicines and Healthcare Administration and
Control Authority (FMHACA) of Ethiopia

INTRODUCTION

It is by far known that medicines are integral components of a health care system. Although there are immense active pharmaceutical entities in the global market, limiting medicines that shall be used within a given country in a given situation is prominent. This is done with due regard to factors like; safety, efficacy, quality, cost- benefit ratio, indication for treatment of diseases considered significant in the national context, sufficient experience with the medicines and other factors.

Through its health and drug policies, the Government of Ethiopia has reaffirmed that the medicines used in health services within the nation shall be determined on the basis of the country's major health problems and capabilities. Thus, to materialize this objective, it is necessary to select medicines which are required for promotion, prevention, diagnosis, treatment/mitigation and rehabilitation of diseases affecting majority of the population.

After two years of use, the fifth edition of the List of Medicines for Ethiopia is now revised in light of the latest development in the fields of medicine and pharmacy. As customary, the purpose of this sixth edition is to provide health professionals and related institutions with up-to-date list of medicines which can be imported or locally produced subject to compliance with the registration requirements of the Authority.

The draft of the revised edition was first prepared by the Authority using a technical working group composed of an internist, a nurse and pharmacists and then enriched through national consultative workshops. Participants involved in the workshops were specialists and professionals from various disciplines i.e. Nursing, Pharmacy, Cardiology, Dentistry, Dermatology, ENT, Internal Medicine, Neurology, Obstetrics & Gynecology, Oncology,

Ophthalmology, Pediatrics, Psychiatry and Surgery; representatives of teaching institutions, professional associations, regional health bureaus, relevant departments of Ministry of Health, pharmaceutical manufacturers & importers, government hospitals and other related organizations (See Annex 1). Soon after, the revised version of National Medicines List was finalized by the National Drug Advisory Committee.

In the course of reviewing the previous edition, medicines which are obsolete, less effective, with low benefit to risk ratio and superseded by better ones have been deleted while medicines with better quality, safety and efficacy profile have been included. Except for the addition of some new categories, the pharmacotherapeutic classification system that was used in the previous edition is still maintained.

By taking the new three-tier health care delivery system into consideration, this list will be further categorized to different levels of health care and community medicine retail outlets. Hence, users of this medicines list are advised to refer to the sub-list which is relevant to the level of service they render.

Since the process of revising national list of medicines is a continuous process which takes into account changing priorities for public health action, epidemiological conditions as well as progress in pharmacological and pharmaceutical findings, this list will be subjected to continuous revision.

Consequently, all users of this list are strongly invited to send their comments and suggestions to the Food, Medicine and Healthcare Administration and Control Authority of Ethiopia, P.O. Box 5681, Tel. 251-11 552 41 22, e-mail daca@ethionet.et, Addis Ababa, Ethiopia.
