### Conducting Dossier Evaluation

ZAMRA staff evaluated the dossier of RH and UN life-saving commodities. The evaluation included the registration status and quality assurance of the commodities. The commodities were reviewed to ensure that all imported and circulating medicines in the country are registered, safe, and of acceptable quality. The review also ascertained the registration status of the UN life-saving commodities. The regulatory status of all the medicines was good, and each category of the medicines, the brands, and their manufacturers of these commodities registered in the country were reviewed to ensure that all imported and circulating medicines in the country are registered, safe, and of acceptable quality. The review ascertained the registration status of the UN life-saving commodities.

### Conclusion:

The regulatory status of all the medicines was good, and each category of the medicines, the brands, and their manufacturers of these commodities registered in the country. In addition, the quality assurance activities were described. The regulatory measures for the medicines in the country ensure that all imported and circulating medicines in the country are registered, safe, and of acceptable quality. The review ascertained the registration status of the UN life-saving commodities.
